Career Background

Front End Developer

Automated Cooperative System

- I have a strong background as a front-end developer, specializing in creating dynamic and user-friendly interfaces for an automated cooperative system. My role involved designing and implementing front-end layouts and developing mobile applications to ensure seamless user experiences across platforms. In addition to my core responsibilities, I have been actively enhancing my skills in quality assurance (QA), focusing on testing and improving application functionality and reliability to meet high standards of performance and user satisfaction. I also done some backend development.

Front End Developer

CTU - AC Supply Office Monitoring System

- I have experience as a front-end developer for the CTU-AC Supply Office Monitoring System, where I focused on designing and implementing responsive layouts to ensure efficient and user-friendly functionality. My work involved crafting intuitive interfaces that streamlined supply office operations while aligning with organizational goals.

Seminar Attended

Pre-Employment Advocacies (2024)

- Malabuyoc, Cebu, Philippines

Navigating the Professional World (2023)

- Work Ethics and Transitioning from student to professional
- San Roque, Ginatilan, Cebu, Philippines

Objectives

As a software developer, front-end developer, UI/UX designer, mobile app front-end developer, and QA I aim to leverage my expertise in crafting visually engaging, user-friendly interfaces and intuitive digital experiences. I am passionate about creating responsive web and mobile applications that seamlessly blend functionality with design, focusing on user-centric solutions that drive engagement and meet business goals. My goal is to contribute to innovative projects where I can utilize my technical proficiency and design acumen to deliver impactful results.
